## Datasheet for ABIN1662730 YOPE Protein (AA 1-219) (His tag)

Overview	
Quantity:	1 mg
Target:	YOPE
Protein Characteristics:	AA 1-219
Origin:	Yersinia pestis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This YOPE protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MKISSFISTS LPLPTSVSGS SSVGEMSGRS VSQQTSDQYA NNLAGRTESP QGSSLASRII
	ERLSSVAHSV IGFIQRMFSE GSHKPVVTPA PTPAQMPSPT SFSDSIKQLA AETLPKYMQQ
	LNSLDAEMLQ KNHDQFATGS GPLRGSITQC QGLMQFCGGE LQAEASAILN TPVCGIPFSQ
	WGTIGGAASA YVASGVDLTQ AANEIKGLAQ QMQKLLSLM
Specificity:	Yersinia pestis
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	YOPE

Target Details	
Abstract:	YOPE Products
Background:	Recommended name: Outer membrane virulence protein yopE
UniProt:	P31493
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of modium and the culture conditions restrict the promotion of mammalian cell expression

of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
