Datasheet for ABIN1662878  
**MRPL15 Protein (AA 29-253) (His tag)**

Overview

Quantity:	1 mg
Target:	MRPL15
Protein Characteristics:	AA 29-253
Origin:	Saccharomyces cerevisiae
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This MRPL15 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	VI YLHKGPRING LRRDPESYLR NPSGVLFTEV NAKCEQDKVR SILQLPKYGI NLSNELILQC LTHKSFAHGS KPYNEKLNLL GAQFLKLQTC IHSLKNGSPA ESCENGQLSL QFSNLGTKFA KELTSKNTAC TFWKLNLDLP FIFWKMRDPI KDGHINGETT IFASVLNAFI GAILSTNGSE KAAKFIQGSL LDKEDLHSLV NIANENVASA KAKISDKENK AFL
Specificity:	Saccharomyces cerevisiae (strain ATCC 204508 / S288c) (Bakers yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	MRPL15
---------	--------

## Target Details

---

Alternative Name: 54S ribosomal protein L15, mitochondrial (MRPL15) ([MRPL15 Products](#))

---

Background: Recommended name: 54S ribosomal protein L15, mitochondrial.  
Alternative name(s): YmL15

---

UniProt: [P36523](#)

---

## Application Details

---

Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

---

Restrictions: For Research Use only

---

## Handling

---

Format: Lyophilized

---

Concentration: 0.2-2 mg/mL

---

Buffer: Tris-based buffer, 50 % glycerol

---

Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

---

Storage: -20 °C

---

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

---
