Datasheet for ABIN1663039

Histone H1.1 Protein (HIST1H1A) (AA 1-232) (His tag)

Go to Product page

Overview

Quantity:	1 mg
Target:	Histone H1.1 (HIST1H1A)
Protein Characteristics:	AA 1-232
Origin:	Midge (Chironomus)
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Histone H1.1 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MSDPAVEVTP AVPVASPAKA KKEKKPKSDK PKKPKAPRTH LPVSDMVVNA VKTLKERGGS SVQAIKKFLV AQYKVDVDKL SPFIKKYLKS AVEKGQLLQT KGKGASGSFK LPAAAKKEKV VKKPKKVAEK KPKKAAAPKP KKAGEKKVKK TIAKKPKAAT ATKIKKPVAK TTKKPAAAKP AAKKAAPKPK AAPKPKAAKK ETKPKKAAAP KAKKPAVEKK PKAAKKPAAK KA
Specificity:	Chironomus tentans (Midge) (Camptochironomus tentans)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	Histone H1.1 (HIST1H1A)

Target Details

Alternative Name:	Histone H1A (HIST1H1A Products)
Background:	Recommended name: Histone H1A
UniProt:	P40275

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
