Datasheet for ABIN1663173

Seryl-tRNA Synthetase (SARS) (AA 1-199) protein (His tag)

Overview

Quantity:	1 mg
Target:	Seryl-tRNA Synthetase (SARS)
Protein Characteristics:	AA 1-199
Origin:	Chinese Hamster
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA

Product Details

Sequence:	LHGRDTRGIF RVHQFEKIEQ FVYTSPHDNK SWEMFEEMIG TAEIFYQSLG IPYHIVNIVS GSLNHAASKK LDLEAWFPGS GAFRELVSCS NCTDYQARRL RIRYGQTKKM MDKVEFVHML NATMCATTRT ICAILENYQT EKGIIVPEKL REFMPPLQLE LIPFVKPAPI DQEPSKKQKK QHEGSKKESK RGHPGEPAA
Specificity:	Cricetulus griseus (Chinese hamster) (Cricetulus barabensis griseus)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	Seryl-tRNA Synthetase (SARS)
---------	------------------------------

Target Details

Alternative Name: Serine--tRNA ligase, cytoplasmic (SARS) ([SARS Products](#))

Background: Recommended name: Serine--tRNA ligase, cytoplasmic.
EC= 6.1.1.11.
Alternative name(s): Seryl-tRNA synthetase.
Short name= SerRS Seryl-tRNA(Ser/Sec) synthetase

UniProt: [P26636](#)

Application Details

Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions: For Research Use only

Handling

Format: Lyophilized

Concentration: 0.2-2 mg/mL

Buffer: Tris-based buffer, 50 % glycerol

Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

Storage: -20 °C

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
