Datasheet for ABIN1663979

**Virion Protein J1R Protein (AA 1-159) (His tag)**

## Overview

Quantity:	1 mg
Target:	Virion Protein J1R (J1R)
Protein Characteristics:	AA 1-159
Origin:	Variola Virus
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Virion Protein J1R protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	MDHNQYLLTM FFADDDSFVK YLASQDDESS LSDILQITQY LDFLLLLLIQ SKNKLEAVGH CYESLSEFYR QLTKFTDSQD FKCLFNKVPI VTDGRVKLNK GYLDFDFVISL MRFKKESALA TTAIDPVRYI DPRRDIAFSN VMDILKSNKA KNNYLLSS
Specificity:	Variola virus (isolate Human/India/Ind3/1967) (VARV) (Smallpox virus)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	Virion Protein J1R (J1R)
Alternative Name:	Protein J1 (J1R) ( <a href="#">J1R Products</a> )

## Target Details

---

Target Type:	Viral Protein
Background:	Recommended name: Protein J1
UniProt:	<a href="#">P33004</a>

## Application Details

---

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>
Restrictions:	For Research Use only

## Handling

---

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
