REC114 Protein (AA 1-428) (His tag)

Overview

Quantity:	1 mg
Target:	REC114
Protein Characteristics:	AA 1-428
Origin:	Saccharomyces cerevisiae
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This REC114 protein is labelled with His tag.
Application:	ELISA

Product Details	
Sequence:	MYEYCSVVIK KYSKYTIPSF APNGFQSMLE PPQIDKWQHL SANCTLQFRV LLMDSRQILI
	NVVLNNSTLL ENIRLPLGDN QDLIQFSCKS PIISCKYISE EFGPRMLRRF QMNLPNDVEF

	IPKERESQMQ SVTGLDATPT IIWSPGKDNT AKKNTSNKKN IDDKLTNPQK SGNTHTPDRN
	KEVLPNGTLN ETRKEASPSE GLTIRVKNVN RNASRKISKR LIKEKLKDEE FMKWVNKVET
	VLNKMFEK
Specificity:	Saccharomyces cerevisiae (strain ATCC 204508 / S288c) (Bakers yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.

Product Details > 90 % Purity: **Target Details** REC114 Target: Meiotic recombination protein REC114 (REC114) (REC114 Products) Alternative Name Background: Recommended name: Meiotic recombination protein R. EC114 UniProt: P32841 **Application Details** The yeast protein expression system is the most economical and efficient eukaryotic system Comment: for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Format: Lyophilized Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

Handling Advice:

Storage Comment:

Storage:

one week

-20 °C

Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to
