

Datasheet for ABIN1664910

Leucoanthocyanidin Dioxygenase Protein (LDOX) (AA 1-362) (His tag)

[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	Leucoanthocyanidin Dioxygenase (LDOX)
Protein Characteristics:	AA 1-362
Origin:	Grapes
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Leucoanthocyanidin Dioxygenase protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MVTSVAPRVE SLSSSGIQSI PKEYIRPQEE LTSIGNVFEE EKKDEGPQVP TIDLKDIESE DEVVRREIRE RCREELKKAA MEWGVMHLVN HGISDDLINR VKVAGETFFN LPMEEKEYA NDQASGKIAG YGSKLANNAS GQLEWEDYFF HLIFPEDKRD MTIWPKTPSD YVPATCEYSV KLRLATKIL SVLSLGLGLE EGRLEKEVGG MEELLLQKKI NYYPKCPQE LALGVEAHTD VSALTFILHN MVPGLQLFYE GKWVTAKCVP NSIIMHIGDT IEILSNGKYK SILHRGLV NK EKVRISWAVF CEPPKEKIIL KAHCQRRCLR LSHHSSHLAP FPNIFSTSSS GRPRRLYSPN EL
Specificity:	Vitis vinifera (Grape)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	Leucoanthocyanidin Dioxygenase (LDOX)
Alternative Name:	Leucoanthocyanidin dioxygenase (LDOX Products)
Background:	<p>Recommended name: Leucoanthocyanidin dioxygenase.</p> <p>Short name= LDOX.</p> <p>Short name= Leucocyanidin oxygenase.</p> <p>EC= 1.14.11.19.</p> <p>Alternative name(s): Leucoanthocyanidin hydroxylase</p>
UniProt:	P51093

Application Details

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
