Datasheet for ABIN1665693 MPHOSPH6 Protein (AA 2-186) (His tag)

Overview

Quantity:	1 mg
Target:	MPHOSPH6
Protein Characteristics:	AA 2-186
Origin:	Saccharomyces cerevisiae
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This MPHOSPH6 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	SANNGVTGK LSSRVMMMKF MKFGKTDDEE SSNSNTPSNI NSDVEPIEQK GKLFGLLDDSA WDLNSYKDDL KKISGKEKKK VKRVVYKKRP NLIISNVGYS ELRKPEGVIS GRKTFGDNSD DSGSRKRKFD EGEQNEDEKR DAKDKFTGS QDDGEDEYDL DKLFKDSIKK KKTNHNGKNK NRNSKK
Specificity:	Saccharomyces cerevisiae (strain ATCC 204508 / S288c) (Bakers yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	MPHOSPH6
---------	----------

Target Details

Alternative Name:	M-phase phosphoprotein 6 homolog (MPP6) (MPHOSPH6 Products)
Background:	Recommended name: M-phase phosphoprotein 6 homolog. Alternative name(s): Exosome-associated RNA-binding protein MPP6
UniProt:	P53725
Pathways:	M Phase

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
