Quantity:1 mgTarget:LOC100280127 (PC0133428)Protein Characteristics:AA 1-318Origin:AlfalfaSource:YeastProtein Type:RecombinantPurification tag / Conjugate:This LOC100280127 protein is labelled with His tag.Application:ELISA	Overview	
Protein Characteristics: AA 1-318 Origin: Alfalfa Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This LOC100280127 protein is labelled with His tag. Application: ELISA	Quantity:	1 mg
Origin: Alfalfa Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This LOC100280127 protein is labelled with His tag. Application: ELISA	Target:	LOC100280127 (PC0133428)
Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This LOC100280127 protein is labelled with His tag. Application: ELISA	Protein Characteristics:	AA 1-318
Protein Type: Recombinant Purification tag / Conjugate: This LOC100280127 protein is labelled with His tag. Application: ELISA	Origin:	Alfalfa
Purification tag / Conjugate: This LOC100280127 protein is labelled with His tag. Application: ELISA	Source:	Yeast
Application: ELISA	Protein Type:	Recombinant
	Purification tag / Conjugate:	This LOC100280127 protein is labelled with His tag.

	WEKKIGKTLE KTYVSEEQVL KDIQESSFPH NYLLALYHSQ QIKGDAVYEI DPAKDIEASE
	AYPDVTYTTA DEYLNQFV
Specificity:	Medicago sativa (Alfalfa)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	LOC100280127 (PC0133428)
Alternative Name:	Isoflavone reductase (IFR) (PCO133428 Products)
Background:	Recommended name: Isoflavone reductase.
	Short name= IFR.
	EC= 1.3.1.45.
	Alternative name(s): 2'-hydroxyisoflavone reductase NADPH:isoflavone oxidoreductase
UniProt:	P52575

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
