Datasheet for ABIN1665988 PLDB Protein (AA 1-340) (His tag)

Overview

Quantity:	1 mg
Target:	PLDB
Protein Characteristics:	AA 1-340
Origin:	E. coli
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This PLDB protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MFQQQKDWET RENAFAAFTM GPLTDFWRQR DEAEFTGVDD IPVRFVRFRA QHHDRVVVIC PGRIESYVKY AELAYDLFHL GFDVLIIDHR GQGRSGRLLA DPHLGHVNR NDYVDDLAAF WQQEVQPGPW RKRYILAHSM GGAISTLFLQ RHPGVCDIA LTAPMFGIVI RMPSFMARQI LNWAEAHPRF RDGYAIGTGR WRALPFAINV LTHSRQRYRR NLRFYADDPT IRVGGPTYHW VRESILAGEQ VLAGAGDDAT PTL LLQAE E RVVDNRMHDR FCELRTAAGH PVEGGRPLVI KGAYHEILFE KDAMRSVALH AIVDFFNRHN SPSG NRSTEV
Specificity:	Escherichia coli O6
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	PLDB
Abstract:	PLDB Products
Background:	Recommended name: Lysophospholipase L2. EC= 3.1.1.5. Alternative name(s): Lecithinase B
UniProt:	P59588

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
