Datasheet for ABIN1666050 LAT Protein (AA 1-449) (His tag)

Overview

Quantity:	1 mg
Target:	LAT
Protein Characteristics:	AA 1-449
Origin:	Mycobacterium bovis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This LAT protein is labelled with His tag.
Application:	ELISA
Product Details

Target Details

Target:	LAT
Alternative Name:	Probable L-lysine-epsilon aminotransferase (lat) (LAT Products)
Background:	Recommended name: Probable L-lysine-epsilon aminotransferase.
	Short name= L-lysine aminotransferase.
	EC= 2.6.1.36.
	Alternative name(s): Lysine 6-aminotransferase
UniProt:	P63510

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.

Handling

Formati	Luophilized
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
