

Datasheet for ABIN1666274
TAM Protein (AA 1-261) (His tag)

[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	TAM
Protein Characteristics:	AA 1-261
Origin:	Mycobacterium tuberculosis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This TAM protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MWDPDVYLAF SGHRNRPFYE LVSRVGLERA RRVVDLGCGP GHLTRYLARR WPGAVIEALD SSPEMVAAAA ERGIDATTGD LRDWKPKPDT DVVVSNAALH WVPEHSDLLV RWVDELAPGS WIAVQIPGNF ETPSHAAVRA LARREPYAKL MRDIPFRVGA VVQSPAYYAE LLMDTGCKVD VWETTYLHQL TGEHPVLDWI TGSALVPVRE RLSDESWQQF RQELIPLLND AYPPrADGST IFPFRRLFMV AEVGGARRSG G
Specificity:	Mycobacterium tuberculosis
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	TAM
Alternative Name:	Probable trans-aconitate 2-methyltransferase (tam) (TAM Products)
Background:	Recommended name: Probable trans-aconitate 2-methyltransferase. EC= 2.1.1.144
UniProt:	P66885

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
