## Hemoglobin Alpha 1 + 2 (HBA1,HBA2) (AA 2-142) protein (His tag)

### Overview

Quantity:	1 mg
Target:	Hemoglobin Alpha 1 + 2 (HBA1,HBA2)
Protein Characteristics:	AA 2-142
Origin:	Equus hemionus kulan
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA

### Product Details

Sequence:	VLSAADKTN VKAAWSKVGG NAGDFGAEAL ERMFLGFPTT KTYFPHFDLS HGSAQVKAHG KKVGDALTLA VGHLDDLPGA LSNLSDLHAH KLRVDPVNFK LLSHCLLSTL AVHLPNDFTP AVHASLDKFL STVSTVLTSK YR
Specificity:	Equus hemionus kulan (Turkmenian kulan) (Equus onager kulan)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

### Target Details

Target:	Hemoglobin Alpha 1 + 2 (HBA1,HBA2)
Alternative Name:	Hemoglobin subunit alpha-1/2 ( <a href="#">HBA1,HBA2 Products</a> )

## Target Details

---

Background:	Recommended name: Hemoglobin subunit alpha-1/2. Alternative name(s): Alpha-1/2-globin Hemoglobin alpha-1/2 chain
UniProt:	<a href="#">P01961</a>

## Application Details

---

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

## Handling

---

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
