Datasheet for ABIN1666546 PTXE Protein (AA 35-133) (His tag)

Overview	
Quantity:	1 mg
Target:	PTXE
Protein Characteristics:	AA 35-133
Origin:	Bordetella pertussis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This PTXE protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	GLPTHL YKNFTVQELA LKLKGKNQEF CLTAFMSGRS LVRACLSDAG HEHDTWFDTM
	LGFAISAYAL KSRIALTVED SPYPGTPGDL LELQICPLNG YCE
Specificity:	Bordetella pertussis (strain Tohama I / ATCC BAA-589 / NCTC 13251)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	PTXE
Alternative Name:	Pertussis toxin subunit 5 (ptxE) (PTXE Products)

Target Details	
Background:	Recommended name: Pertussis toxin subunit 5.
	Short name= PTX S5.
	Alternative name(s): Islet-activating protein S5.
	Short name= IAP S5
UniProt:	P04981
Application Details	

The yeast protein expression system is the most economical and efficient eukaryotic system
for secretion and intracellular expression. A protein expressed by the mammalian cell system is
of very high-quality and close to the natural protein. But the low expression level, the high cost
of medium and the culture conditions restrict the promotion of mammalian cell expression
systems. The yeast protein expression system serve as a eukaryotic system integrate the
advantages of the mammalian cell expression system. A protein expressed by yeast system
could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
native protein conformation. It can be used to produce protein material with high added value
that is very close to the natural protein. Our proteins produced by yeast expression system has
been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
