Datasheet for ABIN1666918  
**YFHG Protein (AA 26-237) (His tag)**

### Overview

Quantity:	1 mg
Target:	YFHG
Protein Characteristics:	AA 26-237
Origin:	Shigella flexneri
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This YFHG protein is labelled with His tag.
Application:	ELISA

### Product Details

Sequence:	CVQNH NKPAIDTPAE EKIPVYQLAD YLSTECSDIW ALQ GKSTETN PLYWLRAMDC ADRLMPAQSR QQARQYDDGS WQNTFKQGIL LADAKITPYE RRQLVARIEA LSTEIPAQVR PLYQLWRDGG ALQLQLAEER QRYSKLQQSS DSELDTLRQQ HHVLQQLEL TTRKLENLTD IERQLSTRKP AGNFSPDTPH ESEKPAPSTH EVTPDEP
Specificity:	Shigella flexneri
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

### Target Details

Target:	YFHG
---------	------

## Target Details

---

Alternative Name: Uncharacterized protein YfhG (yfhG) ([YFHG Products](#))

---

Background: Recommended name: Uncharacterized protein YfhG

---

UniProt: [P0AD46](#)

---

## Application Details

---

Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

---

Restrictions: For Research Use only

---

## Handling

---

Format: Lyophilized

---

Concentration: 0.2-2 mg/mL

---

Buffer: Tris-based buffer, 50 % glycerol

---

Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

---

Storage: -20 °C

---

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

---
