Datasheet for ABIN1667019

**PPP1R1A Protein (AA 1-166) (His tag)**

## Overview

Quantity:	1 mg
Target:	PPP1R1A
Protein Characteristics:	AA 1-166
Origin:	Rabbit
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This PPP1R1A protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	MEQDNSPRKI QFTVPLLEPH LDPEAAEQIR RRRPTPATLV LTSDQSSPEV DEDRIPNPLL KPSLAMSPRQ RKKMTRTTPT MKELQMMVEH HLGQQEQGEE PEGAAEGTGA QESQPPGTPG TGAESRLGPS ATAQKPAQPS PRAQERRGEE PSTAKTSQDS QGASAV
Specificity:	Oryctolagus cuniculus (Rabbit)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	PPP1R1A
Alternative Name:	Protein phosphatase 1 regulatory subunit 1A (PPP1R1A) ( <a href="#">PPP1R1A Products</a> )

## Target Details

Background:	Recommended name: Protein phosphatase 1 regulatory subunit 1A. Alternative name(s): Protein phosphatase inhibitor 1. Short name= I-1. Short name= IPP-1
-------------	--

UniProt:	<a href="#">P01099</a>
----------	------------------------

Pathways:	<a href="#">Cellular Glucan Metabolic Process</a>
-----------	---

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
----------	--

Restrictions:	For Research Use only
---------------	-----------------------

## Handling

Format:	Lyophilized
---------	-------------

Concentration:	0.2-2 mg/mL
----------------	-------------

Buffer:	Tris-based buffer, 50 % glycerol
---------	----------------------------------

Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
------------------	---

Storage:	-20 °C
----------	--------

Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
------------------	--
