antibodies

Datasheet for ABIN1667085 beta-Lactoglobulin-1 (LGB1) (AA 19-180) protein (His tag)

Overview

Quantity:	1 mg
Target:	beta-Lactoglobulin-1 (LGB1)
Protein Characteristics:	AA 19-180
Origin:	Horse
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA
Product Details	
Sequence:	TN IPQTMQDLDL QEVAGKWHSV AMAASDISLL DSESAPLRVY IEKLRPTPED NLEIILREGE NKGCAEKKIF AEKTESPAEF KINYLDEDTV FALDTDYKNY LFLCMKNAAT PGQSLVCQYL ARTQMVDEEI MEKFRRALQP LPGRVQIVPD LTRMAERCRI
Specificity:	Equus caballus (Horse)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalier cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	beta-Lactoglobulin-1 (LGB1)
Abstract:	LGB1 Products

International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/2 | Product datasheet for ABIN1667085 | 09/11/2023 | Copyright antibodies-online. All rights reserved.

Target Details	
Background:	Recommended name: Beta-lactoglobulin-1.
	Short name= Beta-LG-1.
	Alternative name(s): Beta-lactoglobulin I.
	Short name= BLGI
UniProt:	P02758
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system

for secretion and intracellular expression. A protein expressed by the mammalian cell system is
of very high-quality and close to the natural protein. But the low expression level, the high cost
of medium and the culture conditions restrict the promotion of mammalian cell expression
systems. The yeast protein expression system serve as a eukaryotic system integrate the
advantages of the mammalian cell expression system. A protein expressed by yeast system
could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
native protein conformation. It can be used to produce protein material with high added value
that is very close to the natural protein. Our proteins produced by yeast expression system has
been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
