Datasheet for ABIN1667452 BVGA Protein (AA 1-209) (His tag)

| Overview | |
|-------------------------------|--|
| Quantity: | 1 mg |
| Target: | BVGA |
| Protein Characteristics: | AA 1-209 |
| Origin: | Bordetella bronchiseptica |
| Source: | Yeast |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This BVGA protein is labelled with His tag. |
| Application: | ELISA |
| Product Details | |
| Sequence: | MYNKVLIIDD HPVLRFAVRV LMEKEGFEVI GETDNGIDGL KIAREKIPNL VVLDIGIPKL DGLEVIARLQ SLGLPLRVLV LTGQPPSLFA RRCLNSGAAG FVCKHENLHE VINAAKAVMA GYTYFPSTTL SEMRMGDNAK SDSTLISVLS NRELTVLQLL AQGMSNKDIA DSMFLSNKTV STYKTRLLQK LNATSLVELI DLAKRNNLA |
| Specificity: | Bordetella bronchiseptica (strain ATCC BAA-588 / NCTC 13252 / RB50) (Alcaligenes bronchisepticus) |
| Characteristics: | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. |
| Purity: | > 90 % |

Target Details

| Target: | BVGA |
|-------------------|---|
| Alternative Name: | Virulence factors putative positive transcription regulator BvgA (bvgA) (BVGA Products) |
| Background: | Recommended name: Virulence factors putative positive transcription regulator BvgA |
| UniProt: | P0A4H3 |

Application Details

| The yeast protein expression system is the most economical and efficient eukaryotic system |
|--|
| for secretion and intracellular expression. A protein expressed by the mammalian cell system is |
| of very high-quality and close to the natural protein. But the low expression level, the high cost |
| of medium and the culture conditions restrict the promotion of mammalian cell expression |
| systems. The yeast protein expression system serve as a eukaryotic system integrate the |
| advantages of the mammalian cell expression system. A protein expressed by yeast system |
| could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the |
| native protein conformation. It can be used to produce protein material with high added value |
| that is very close to the natural protein. Our proteins produced by yeast expression system has |
| been used as raw materials for downstream preparation of monoclonal antibodies. |

Restrictions:

For Research Use only

Handling

| Format: | Lyophilized |
|------------------|---|
| Concentration: | 0.2-2 mg/mL |
| Buffer: | Tris-based buffer, 50 % glycerol |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage: | -20 °C |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C. |
