## Datasheet for ABIN1667655 Hemoglobin Subunit alpha-A (HBAA) (AA 2-142) protein (His tag)

Overview

Abstract:	HBAA Products
Target:	Hemoglobin Subunit alpha-A (HBAA)
Target Details	
Purity:	> 90 %
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalier
Specificity:	Anseranas semipalmata (Magpie goose)
	EVHASMDKFL CAVATVLTAK YR
	KKVAAALVEA ANHIDDIAGA LSKLSDLHAQ KLRVDPVNFK FLGHCFLVVL AIHHPSLLTP
Sequence:	VLSAADKGN VKTVFGKIGG HAEEYGAETL QRMFQTFPQT KTYFPHFDLQ PGSAQIKAHG
Product Details	
Application:	ELISA
Purification tag / Conjugate:	His tag
Protein Type:	Recombinant
Source:	Yeast
Origin:	Anseranas semipalmata
Protein Characteristics:	AA 2-142
Target:	Hemoglobin Subunit alpha-A (HBAA)
Quantity:	1 mg

International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/2 | Product datasheet for ABIN1667655 | 09/11/2023 | Copyright antibodies-online. All rights reserved.

Target Details	
Target Type:	Viral Protein
Background:	Recommended name: Hemoglobin subunit alpha-A.
	Alternative name(s): Alpha-A-globin Hemoglobin alpha-A chain
UniProt:	P01985
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
