Uba4p (UBA4) (AA 1-482) protein (His tag)

Overview

Quantity:	1 mg
Target:	Uba4p (UBA4)
Protein Characteristics:	AA 1-482
Origin:	Aspergillus niger
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA

Product Details	
Sequence:	MNGVEQTCAS LRTQIAATEA KLADLKRELE IAEQAAASHK QNAADAEGGS ERRWPLLDEE
	YRRYGRQMIV PQLGIQGQLK LRSAKVLIVG AGGLGCPAAL YLAGAGVGTL GLVDGDAVES

	DVASSQSTDP VYVVCRLGND SQVAVKKLKE LGLDQGGKRV VADIRGGFRA WKEQVDPEWP EY
Specificity:	Aspergillus niger (strain CBS 513.88 / FGSC A1513)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalier
	cells or by baculovirus infection. Be aware about differences in price and lead time.

Product Details

Purity:

> 90 %

A2R3H4

Target Details

Target:	Uba4p (UBA4)
Alternative Name:	Adenylyltransferase and sulfurtransferase uba4 (uba4) (UBA4 Products)
Background:	Recommended name: Adenylyltransferase and sulfurtransferase uba4. Alternative name(s): Common component for nitrate reductase and xanthine dehydrogenase protein F Ubiquitin-like protein activator 4 Including the following 2 domains: Molybdopterinsynthase adenylyltransferase. EC= 2.7.7.80. Alternative name(s): Adenylyltransferase uba4 Sulfur carrier protein MOCS2A adenylyltransferase Molybdopterin-synthase sulfurtransferase. EC= 2.8.1.11. Alternative name(s): Sulfur carrier protein MOCS2A sulfurtransferase Sulfurtransferase uba4

Application Details

Comment:

UniProt:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL

Handling

Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
