

Defensin, beta 105A (DEFB105A) (AA 28-78) protein (His tag)

()	11/	IN	/ie	A .
	/ // 	۱ ات	/ (−	' \/\/

Quantity:	1 mg
Target:	Defensin, beta 105A (DEFB105A)
Protein Characteristics:	AA 28-78
Origin:	Pongo pygmaeus
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA

Product Details

Purity:	> 90 %	
	cells or by baculovirus infection. Be aware about differences in price and lead time.	
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien	
Specificity:	Pongo pygmaeus (Bornean orangutan)	
Sequence:	GLD FSQPFPSDEF AVCESCKLGR GKCRKECLEN EKPDGNCRLN FLCCRERI	

Target Details

Target:	Defensin, beta 105A (DEFB105A)	
Alternative Name:	Beta-defensin 105A (DEFB105A) (DEFB105A Products)	
Background: Recommended name: Beta-defensin 105A.		

Target Details		
	Alternative name(s): Defensin, beta 105 Defensin, beta 105A	
UniProt:	A4H207	
Application Details		
Comment: Restrictions:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. For Research Use only	
Handling		
Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
