Datasheet for ABIN1668991
OGG1 Protein (AA 1-207) (His tag)

Overview

Quantity:	1 mg
Target:	OGG1
Protein Characteristics:	AA 1-207
Origin:	Thermotoga petrophila
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This OGG1 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MEELLKELER IREEAKPLVE QRFEFEKRLG EEGTEEDLFC ELSFCVLTAN WSAEGGIRAQ KEIGKGFVHL PLEELAELKLR EVGHRYPQKR AEFIVENRKL LGKLNKLVKG DPFQSREFLV RNAKGIGWKE ASHFLRNTGV EDLAILDKHV LRLMKRHGLI QEIPKGWSKK RYLYVEEILR KVAEAFGESP GKFDLYLWYL VKGKVDK
Specificity:	Thermotoga petrophila (strain RKU-1 / ATCC BAA-488 / DSM 13995)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	OGG1
---------	------

Target Details

Alternative Name:	Probable N-glycosylase/DNA lyase (ogg) (OGG1 Products)
Background:	Recommended name: Probable N-glycosylase/DNA lyase Including the following 2 domains: 8-oxoguanine DNA glycosylase. EC= 3.2.2.- DNA-(apurinic or apyrimidinic site) lyase. Short name= AP lyase. EC= 4.2.99.18
UniProt:	A5ILP7
Pathways:	DNA Damage Repair

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
