

Datasheet for ABIN1669001 XPT1 Protein (AA 1-190) (His tag)

Quer inco	
Overview	
Quantity:	1 mg
Target:	XPT1
Protein Characteristics:	AA 1-190
Origin:	Clostridium botulinum
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This XPT1 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MEKLQNRILQ EGHALSETVL KVDSFLNHQV DPDLMYEIGT YFKNYFKEHK ITKVFTIESS
	GIAPAVMTAM QMNLPMVILK KQASKILNGD VYQTTVHSFT KGLDYELTLS KKYIAKEDNI
	LIIDDFLANG EAALGAARLV KEAGAKVAGM GIVIEKSFQP GRKMLEDKGY DVYSLARIAK
	LQKGLIEFVK
Specificity:	Clostridium botulinum (strain Hall / ATCC 3502 / NCTC 13319 / Type A)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	XPT1

Target Details	
Alternative Name:	Xanthine phosphoribosyltransferase 1 (xpt1) (XPT1 Products)
Background:	Recommended name: Xanthine phosphoribosyltransferase 1. Short name= XPRTase 1. EC= 2.4.2.22
UniProt:	A5HYL0
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the

native protein conformation. It can be used to produce protein material with high added value

that is very close to the natural protein. Our proteins produced by yeast expression system has

been used as raw materials for downstream preparation of monoclonal antibodies.

Handling	
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

For Research Use only
