Uracil Phosphoribosyltransferase (UPP) (AA 1-208) protein (His tag)

Overview

Target:

Quantity:	1 mg
Target:	Uracil Phosphoribosyltransferase (UPP)
Protein Characteristics:	AA 1-208
Origin:	Ochrobactrum anthropi
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA
Product Details	
Sequence:	MGVTVVSHPL VQHKLTIMRK KETSTASFRR LLKEISLLLC YEVTRDLELT TMPIETPLMP
	MDAPVLEGKK LVFASILRAG NGLLEGMLDL VPAARVAHIG LYRDHDTLQP VEYYFKAPED
	IVNRLIIVVD PMLATGHSAI AAIDKLKERG ATNIRFLCLL AAPEGIKRFT EAHPDVDVFT
	ASIDERLDEK GYIVPGLGDA GDRMYGTK
Specificity:	Ochrobactrum anthropi (strain ATCC 49188 / DSM 6882 / NCTC 12168)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details

Uracil Phosphoribosyltransferase (UPP)

Target Details

Abstract:	UPP Products
Background:	Recommended name: Uracil phosphoribosyltransferase. EC= 2.4.2.9. Alternative name(s): UMP pyrophosphorylase UPRTase
UniProt:	A6WYH9

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
