

Datasheet for ABIN1669721

PCM1 Protein (AA 1-212) (His tag)

Quantity:	1 mg
Target:	PCM1

Protein Characteristics: AA 1-212

Origin: Anaeromyxobacter sp.

Source: Yeast

Protein Type: Recombinant

Purification tag / Conjugate: This PCM1 protein is labelled with His tag.

Application: **ELISA**

Product Details

Overview

Sequence:	MVRWSVSAEL SRAVAAMGIR DPAVLRAIAE VPRDLFVPPR LRHQAGADQA LPIGFGQTIS
	QPFVVAFMTE RLHLTGLERV LEVGTGSGYQ TAILARLAAE VFSIEIVPEL AARARAALLE
	TLHLRNVRLR TGDGAAGWPE AAPFDRVLVT AAAPEVPPAL TAQLAPGGRM VVPVGAAPGL
	QVLRAVDKGN DGVDLSTDLI PVRFVPLTGA SG
Specificity:	Anaeromyxobacter sp. (strain Fw109-5)
Specificity: Characteristics:	Anaeromyxobacter sp. (strain Fw109-5) Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien

Target Details

PCM1 Target:

Target Details

Abstract:	PCM1 Products
Background:	Recommended name: Protein-L-isoaspartate O-methyltransferase 1. EC= 2.1.1.77.
	Alternative name(s): L-isoaspartyl protein carboxyl methyltransferase 1 Protein L-isoaspartyl
	methyltransferase 1 Protein-beta-aspartate methyltransferase 1. Short name= PIMT 1
UniProt:	A7HC32

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
