

Datasheet for ABIN1670280

Phenylalanyl-tRNA Synthetase, alpha Subunit (FARSA) (AA 1-328) protein (His tag)

[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	Phenylalanyl-tRNA Synthetase, alpha Subunit (FARSA)
Protein Characteristics:	AA 1-328
Origin:	Coxiella burnetii
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA

Product Details

Sequence:	MQNQLNALLQ SAKKSVADAQ SEIVLEEIRV DYLGKKGKLT ELLKSVGQMP ADQRPLLGKA VNEIKREIQQ LLNAKSTQLR EKSLQEKLNK EKVDITLRGR YDHLGAIHPI SRVSERVSQ FSMLGFQIAE GPEIENEYYN FEALNIPADH PARTMADTFY FSGDKLLRTH TSPVQIREME KQGVPIRLIA LGRVYRRDLQ QHTPMFHQV EGLVIDKRST FANLKGLLQQ FLNCFEFDV RLRFRPSYFP FTEPSAEVDI YQPRTDKWLE VLGCVMVHPN VLRNLNIDPD EYSGFAFGIG LDRLAMLRYE VTDLRLFFEN DLRFLGQF
Specificity:	Coxiella burnetii (strain Dugway 5J108-111)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	Phenylalanyl-tRNA Synthetase, alpha Subunit (FARSA)
Alternative Name:	Phenylalanine--tRNA ligase alpha subunit (pheS) (FARSA Products)
Background:	Recommended name: Phenylalanine--tRNA ligase alpha subunit. EC= 6.1.1.20. Alternative name(s): Phenylalanyl-tRNA synthetase alpha subunit. Short name= PheRS
UniProt:	A9KGB7

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
