antibodies

## Datasheet for ABIN1670327 Uracil Phosphoribosyltransferase (UPP) (AA 1-208) protein (His tag)

Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | Uracil Phosphoribosyltransferase (UPP)   |
| Protein Characteristics:      | AA 1-208   |
| Origin:                       | Salmonella arizonae  |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | His tag  |
| Application:                  | ELISA  |
| Product Details               |  |
| Sequence:                     | MKIVEVKHPL VKHKLGLMRE NDISTKRFRE LASEVGSLLT YEATADLETE KVTIEGWNGP                                |
|                               | VEIDQIKGKK ITVVPILRAG LGMMEGVLEN VPSARISVVG MYRNEETLEP VPYFQKLVSN                                |
|                               | IDERMALIVD PMLATGGSVI ATIDLLKKAG CSSIKVLVLV AAPEGIAALE KAHPDVELYT                                |
|                               | ASIDQGLNEH GYIIPGLGDA GDKIFGTK   |
| Specificity:                  | Salmonella arizonae (strain ATCC BAA-731 / CDC346-86 / RSK2980)                                  |
| Characteristics:              | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien |
|                               | cells or by baculovirus infection. Be aware about differences in price and lead time.            |
| Purity:                       | > 90 %   |
| Target Details                |  |

Target:

Uracil Phosphoribosyltransferase (UPP)

| Target Details      |  |
|---------------------|--|
| Abstract:           | UPP Products   |
| Background:         | Recommended name: Uracil phosphoribosyltransferase.  |
|                     | EC= 2.4.2.9.   |
|                     | Alternative name(s): UMP pyrophosphorylase UPRTase   |
| UniProt:            | A9MHP1   |
| Application Details |  |
| Comment:            | The yeast protein expression system is the most economical and efficient eukaryotic system         |
|                     | for secretion and intracellular expression. A protein expressed by the mammalian cell system is    |
|                     | of very high-quality and close to the natural protein. But the low expression level, the high cost |
|                     | of medium and the culture conditions restrict the promotion of mammalian cell expression           |
|                     | systems. The yeast protein expression system serve as a eukaryotic system integrate the            |
|                     | advantages of the mammalian cell expression system. A protein expressed by yeast system            |
|                     | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the     |
|                     | native protein conformation. It can be used to produce protein material with high added value      |
|                     | that is very close to the natural protein. Our proteins produced by yeast expression system has    |
|                     | been used as raw materials for downstream preparation of monoclonal antibodies.                    |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Lyophilized  |

| Concentration:   | 0.2-2 mg/mL   |
|------------------|---|
| Buffer:          | Tris-based buffer, 50 % glycerol  |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage:         | -20 °C  |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.                                |
