antibodies

Datasheet for ABIN1670773 Phenylalanyl-tRNA Synthetase, alpha Subunit (FARSA) (AA 1-327) protein (His tag)

Overview

Quantity:	1 mg
Target:	Phenylalanyl-tRNA Synthetase, alpha Subunit (FARSA)
Protein Characteristics:	AA 1-327
Origin:	Erwinia tasmaniensis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA
Product Details

cells or by baculovirus infection. Be aware about differences in price and lead time.

Target Details	
Target:	Phenylalanyl-tRNA Synthetase, alpha Subunit (FARSA)
Alternative Name:	PhenylalaninetRNA ligase alpha subunit (pheS) (FARSA Products)
UniProt:	B2VEL4
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
