Datasheet for ABIN1672008

Ribose 5-Phosphate Isomerase A (RPIA) (AA 1-218) protein (His tag)

Overview

Quantity:	1 mg
Target:	Ribose 5-Phosphate Isomerase A (RPIA)
Protein Characteristics:	AA 1-218
Origin:	Vibrio splendidus
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA

Product Details

Sequence:	MTQDEMKKAA GWAALQYVEE GSIVGVGTGS TVNHFIDALG TMKDKIKGAV SSSIASTEKL EAL EIKVFEC NDVFKLDIYV DGADEINGSR DMIKGGGAAL TREKIVAAIS DKFICIVDGT KAVDVLGKFP LPVEVIPMAR SYVARELVKL GGDPVYREGC TTDNGNVILD VYGMAIENPK QLEDIINGIA GVVTVGLFAH RGADVITGT PEGAKIEE
Specificity:	Vibrio splendidus (strain LGP32) (Vibrio splendidus (strain Mel32))
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	Ribose 5-Phosphate Isomerase A (RPIA)
---------	---------------------------------------

Target Details

Alternative Name:	Ribose-5-phosphate isomerase A (rpiA) (RPIA Products)
Background:	Recommended name: Ribose-5-phosphate isomerase A. EC= 5.3.1.6. Alternative name(s): Phosphoriboisomerase A. Short name= PRI
UniProt:	B7VK98
Pathways:	Cellular Glucan Metabolic Process , Ribonucleoside Biosynthetic Process

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
