### KARS Protein (AA 1-492) (His tag)

#### Overview

Quantity:	1 mg
Target:	KARS
Protein Characteristics:	AA 1-492
Origin:	Mycoplasma gallisepticum
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This KARS protein is labelled with His tag.
Application:	ELISA

Specificity:	Mycoplasma gallisepticum (strain R(low / passage 15 / clone 2))
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.

## **Product Details** Purity: > 90 % **Target Details KARS** Target: Alternative Name Lysine--tRNA ligase (lysS) (KARS Products) Background: Recommended name: Lysine--tRNA ligase. EC= 6.1.1.6. Alternative name(s): Lysyl-tRNA synthetase. Short name= LysRS UniProt: Q7NC34 **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value

Restrictions: For Research Use only

#### Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C

that is very close to the natural protein. Our proteins produced by yeast expression system has

been used as raw materials for downstream preparation of monoclonal antibodies.

Storage Comment:

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
