Purity:

Quantity:	1 mg
Target:	ISPD
Protein Characteristics:	AA 1-225
Origin:	Chromobacterium violaceum
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This ISPD protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MIALVPAAGS GSRFGAPSPK QYLQLNGKPL MWHTLATVAA VPDVDEVAVV ISPQDEWFDD FAWDLPKLSV HRVGGASRAQ SVASGLAALA CADDDWVLVH DAARCCLSVA AVERLIAALS GHAVGGLLAL PVPDTVKRAD IDGHVAATVP RNGLWLAQTP QMFRAGLLAR ALSSAAAEDI TDEASAVERL GVKPLLVEGD AQNFKITYPR DLALARAILA ARDEY
Specificity:	Chromobacterium violaceum (strain ATCC 12472 / DSM 30191 / JCM 1249 / NBRC 12614 / NCIMB 9131 / NCTC 9757)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.

> 90 %

Target Details

Target:	ISPD
Abstract:	ISPD Products
Background:	Recommended name: 2-C-methyl-D-erythritol 4-phosphate cytidylyltransferase.
	EC= 2.7.7.60.
	Alternative name(s): 4-diphosphocytidyl-2C-methyl-D-erythritol synthase MEP
	cytidylyltransferase.
	Short name= MCT
UniProt:	Q7NYL6

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
