Datasheet for ABIN1674055

SSR1 Protein (AA 230-319) (His tag)

Overview Quantity: 1 mg SSR1 Target: Protein Characteristics: AA 230-319 Origin: Rat Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This SSR1 protein is labelled with His tag. Application: **ELISA Product Details** L ESRKRKRPIQ KVEMGTSSON DVDMSWIPQE TLNQISAGRE RHTEVTLQLH RPVVSDASYA Sequence: CFSCFRKLPR PATLAAWTSS LRQLAVCGI Specificity: Rattus norvegicus (Rat) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % **Target Details** SSR1 Target: Alternative Name: Translocon-associated protein subunit alpha (Ssr1) (SSR1 Products)

Target Details

Background:	Recommended name: Translocon-associated protein subunit alpha.
	Short name= TRAP-alpha.
	Alternative name(s): Liver regeneration-related protein LRRG137 Signal sequence receptor
	subunit alpha.
	Short name= SSR-alpha
UniProt:	Q7TPJ0
Pathways:	ER-Nucleus Signaling

Application Details

Co	 	 _+.

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
