

Datasheet for ABIN1674641

**GNAS Protein (AA 47-256) (His tag)**[Go to Product page](#)

## Overview

|                               |   |
|-------------------------------|---|
| Quantity:                     | 1 mg  |
| Target:                       | GNAS  |
| Protein Characteristics:      | AA 47-256                                   |
| Origin:                       | Rat   |
| Source:                       | Yeast                                       |
| Protein Type:                 | Recombinant                                 |
| Purification tag / Conjugate: | This GNAS protein is labelled with His tag. |
| Application:                  | ELISA                                       |

## Product Details

|                  |  |
|------------------|--|
| Sequence:        | SSNA RAQQRAAQRR SFLNAHHRSA AAAAAAQVLP ESSESSESDHE HEEAEPELAR PECLEYDQDD<br>YETETDSETE PESDIQSETE FETEPETEPE TAPTTEPETE PEDERGPRGA TFNQSLTQRL<br>HALKLQSADA SPRAQPTTQ EPESASEGEE PQREPLDEDP RDPEESEERR EANRQPRRCK<br>TRRPARRRDQ SPESPPrKGP IPIRRH |
| Specificity:     | Rattus norvegicus (Rat)  |
| Characteristics: | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.   |
| Purity:          | > 90 %   |

## Target Details

|         |      |
|---------|------|
| Target: | GNAS |
|---------|------|

## Target Details

|                   |   |
|-------------------|---|
| Alternative Name: | Neuroendocrine secretory protein 55 (Gnas) ( <a href="#">GNAS Products</a> )  |
| Background:       | Recommended name: Neuroendocrine secretory protein 55.<br>Short name= NESP55 Cleaved into the following 2 chains: 1.<br>LHAL tetrapeptide 2.<br>GPIPIRRH peptide                          |
| UniProt:          | <a href="#">Q792G6</a>  |
| Pathways:         | <a href="#">Thyroid Hormone Synthesis</a> , <a href="#">cAMP Metabolic Process</a> , <a href="#">Myometrial Relaxation and Contraction</a> , <a href="#">Embryonic Body Morphogenesis</a> |

## Application Details

|               |  |
|---------------|--|
| Comment:      | The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. |
| Restrictions: | For Research Use only  |

## Handling

|                  |   |
|------------------|---|
| Format:          | Lyophilized   |
| Concentration:   | 0.2-2 mg/mL   |
| Buffer:          | Tris-based buffer, 50 % glycerol  |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage:         | -20 °C  |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.                                |
