

Datasheet for ABIN1675168
FSHB Protein (AA 21-129) (His tag)

[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	FSHB
Protein Characteristics:	AA 21-129
Origin:	Buffalo
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This FSHB protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	CELTNITIV EKEECGFCIS INTTWAGYC YTRDLVYRDP ARPNIQKTCT YKELVYETVK VPGCAHHADS LYTPVATEC QCGKCDGDST DCTVRGLGPS YCSFSESRE
Specificity:	Bubalus bubalis (Domestic water buffalo)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	FSHB
Alternative Name:	Follitropin subunit beta (FSHB) (FSHB Products)

Target Details

Background:	Recommended name: Follitropin subunit beta. Alternative name(s): Follicle-stimulating hormone beta subunit. Short name= FSH-B. Short name= FSH-beta Follitropin beta chain
UniProt:	Q6SV86
Pathways:	Peptide Hormone Metabolism , Hormone Activity , C21-Steroid Hormone Metabolic Process

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
