## Datasheet for ABIN1675169 MYF6 Protein (AA 1-239) (His tag)

| Overview                      |  |
|-------------------------------|--|
| Quantity:                     | 1 mg   |
| Target:                       | MYF6   |
| Protein Characteristics:      | AA 1-239   |
| Origin:                       | Takifugu rubripes  |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This MYF6 protein is labelled with His tag.  |
| Application:                  | ELISA  |
| Product Details               |  |
| Sequence:                     | MMDLFETNTY LFNDLRYLEE GDHGPLQHLD MSGVSPLYNG NDSPLSPGQD NVPSETGGES                                |
|                               | SGDEHVLAPP GLRSHCEGQC LMWACKICKR KSAPTDRRKA ATLRERRRLK KINEAFDALK                                |
|                               | RKTVANPNQR LPKVEILRSA ISYIERLQDL LQTLDEQERS QSGASDTRND KEQNRPSGGD                                |
|                               | YRWKKASNTW PTSADHSAII NQRDGNCESS ATSSLLCLSS IVSSISDDKT NLRQGVQED                                 |
| Specificity:                  | Takifugu rubripes (Japanese pufferfish) (Fugu rubripes)  |
| Characteristics:              | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien |
|                               | cells or by baculovirus infection. Be aware about differences in price and lead time.            |
| Purity:                       | > 90 %   |
| Target Details                |  |
| Target:                       | MYF6   |

## Target Details

| Abstract:   | MYF6 Products  |
|-------------|--|
| Background: | Recommended name: Myogenic factor 6.<br>Short name= Myf-6. |
|             | Alternative name(s): Muscle-specific regulatory factor 4   |
| UniProt:    | Q6SYV5   |
| Pathways:   | Regulation of Muscle Cell Differentiation                  |

## Application Details

| The yeast protein expression system is the most economical and efficient eukaryotic system         |
|--|
| for secretion and intracellular expression. A protein expressed by the mammalian cell system is    |
| of very high-quality and close to the natural protein. But the low expression level, the high cost |
| of medium and the culture conditions restrict the promotion of mammalian cell expression           |
| systems. The yeast protein expression system serve as a eukaryotic system integrate the            |
| advantages of the mammalian cell expression system. A protein expressed by yeast system            |
| could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the     |
| native protein conformation. It can be used to produce protein material with high added value      |
| that is very close to the natural protein. Our proteins produced by yeast expression system has    |
| been used as raw materials for downstream preparation of monoclonal antibodies.                    |
|  |

For Research Use only

## Handling

| Format:          | Lyophilized   |
|------------------|---|
| Concentration:   | 0.2-2 mg/mL   |
| Buffer:          | Tris-based buffer, 50 % glycerol  |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage:         | -20 °C  |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.                                |
