Datasheet for ABIN1675176

NUDT16 Protein (AA 1-212) (His tag)

Go to Product page

Overview

Quantity:	1 mg
Target:	NUDT16
Protein Characteristics:	AA 1-212
Origin:	Xenopus laevis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This NUDT16 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MAESRSPDRG AKEDKPRPRN ISREESLQLE GYKHACHALL HAPSQAKLFD RVPIRRVLLM MMRFDGRLGF PGGFVDTRDI SLEEGLKREL EEELGPALAT VEVTEDDYRS SQVREHPQKC VTHFYIKELK LEEIERIEAE AVNAKDHGLE VMGLIRVPLY TLRDRVGGLP AFLCNNFIGN SKSQLLYALR SLKLLREDQI QEVLKASHRL QY
Specificity:	Xenopus laevis (African clawed frog)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	NUDT16

Target Details

Alternative Name:	U8 snoRNA-decapping enzyme (nudt16) (NUDT16 Products)
Background:	Recommended name: U8 snoRNA-decapping enzyme. EC= 3.6.1.-. Alternative name(s): Nucleoside diphosphate-linked moiety X motif 16. Short name= Nudix motif 16 U8 snoRNA-binding protein X29
UniProt:	Q6TEC1
Pathways:	Positive Regulation of Response to DNA Damage Stimulus

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
