

# Datasheet for ABIN1676299

# PIP4K2C Protein (AA 1-416) (His tag)

Go to Product page

$\sim$				
$O_1$	<b>/</b> el	rVI	161	Λ

Characteristics:

> 90 %

Purity:

Quantity:	1 mg
Target:	PIP4K2C
Protein Characteristics:	AA 1-416
Origin:	Zebrafish (Danio rerio)
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This PIP4K2C protein is labelled with His tag.
Application:	ELISA

Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien

cells or by baculovirus infection. Be aware about differences in price and lead time.

### **Target Details**

Target:	PIP4K2C		
Alternative Name:	Phosphatidylinositol 5-phosphate 4-kinase type-2 gamma (pip4k2c) (PIP4K2C Products)		
Background:	Recommended name: Phosphatidylinositol 5-phosphate 4-kinase type-2 gamma.		
	EC= 2.7.1.149.		
	Alternative name(s): Phosphatidylinositol 5-phosphate 4-kinase type II gamma.		
	Short name= PI(5)P 4-kinase type II gamma.		
	Short name= PIP4KII-gamma		
UniProt:	Q6IQE1		
Pathways:	Inositol Metabolic Process		

## **Application Details**

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
