Datasheet for ABIN1678423 PRS1 Protein (AA 1-318) (His tag)

Overview	
Quantity:	1 mg
Target:	PRS1
Protein Characteristics:	AA 1-318
Origin:	Listeria ivanovii
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This PRS1 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	
Sequence.	MSNEYFDPKL KIFSLNSNRE LAEEIAKEVG IELGKSSVTH FSDGEIQINI EESIRGCHVY

Target Details

Target:	PRS1
Abstract:	PRS1 Products
Background:	Recommended name: Ribose-phosphate pyrophosphokinase 1.
	Short name= RPPK 1.
	EC= 2.7.6.1.
	Alternative name(s): Phosphoribosyl pyrophosphate synthase 1.
	Short name= P-Rib-PP synthase 1.
	Short name= PRPP synthase 1
UniProt:	Q83YI7

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

Storage Comment:

Storage:

-20 °C

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
