Quantity:	100 tests
. ,	
Target:	CD200
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This CD200 antibody is conjugated to PE
Application:	Flow Cytometry (FACS)

Product Details

Immunogen:	recombinant human CD200
Clone:	OX-104
Isotype:	IgG1 kappa
Specificity:	The mouse monoclonal antibody OX-104 recognizes an extracellular epitope of CD200, a type-1 glycoprotein of the immunoglobulin superfamily, which is expressed in neurons, B and T cell subsets, keratinocytes, follicular dendritic cells, and ovarian cells.
Cross-Reactivity (Details):	Human
Purification:	Purified antibody is conjugated with R-phycoerythrin (PE) under optimum conditions. Unconjugated antibody and free fluorochrome are removed by size-exclusion chromatography.

Target Details

CD200

Target Details

ains two extracellular immunoglobulin domains, transmembrane domain and cytoplasmic ain. It is expressed by neuronal cells, B and T cell subsets, follicular dendritic cells, tinocytes, and ovarian cells. The interaction between CD200 and its receptor CD200R lts in macrophage activation (IL-6 production), inhibition of mast cell degranulation along reduced TNF-alpha and IL-13 secretion and overall attenuation of the activation status of shocytes. It seems CD200 is also involved in maternal tolerance and its decreased ession in hair follicle correlates with follicular miniaturization.,MRC, MOX, OX-2
