antibodies

## Datasheet for ABIN1692653 anti-Chromosome 5 Open Reading Frame 20 (C5ORF20) (AA 131-244) antibody (Alexa Fluor 350)

Overview

| Quantity:            | 100 µL                                                                                                                         |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------|
| Target:              | Chromosome 5 Open Reading Frame 20 (C50RF20)                                                                                   |
| Binding Specificity: | AA 131-244                                                                                                                     |
| Reactivity:          | Human                                                                                                                          |
| Host:                | Rabbit                                                                                                                         |
| Clonality:           | Polyclonal                                                                                                                     |
| Conjugate:           | Alexa Fluor 350                                                                                                                |
| Application:         | Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |

## Product Details

| Immunogen:            | KLH conjugated synthetic peptide derived from human C5orf20                            |
|-----------------------|----------------------------------------------------------------------------------------|
| Isotype:              | lgG                                                                                    |
| Predicted Reactivity: | Human                                                                                  |
| Purification:         | Purified by Protein A.                                                                 |
| Target Details        |                                                                                        |
| Target:               | Chromosome 5 Open Reading Frame 20 (C50RF20)                                           |
| Alternative Name:     | C5orf20 (C5ORF20 Products)                                                             |
| Background:           | Synonyms: Chromosome 5 open reading frame 20, DCNP1, Dendritic cell nuclear protein 1, |

## DCNP1\_HUMAN.

Background: C5orf20 is a intronless gene is specifically expressed in dendritic cells (DCs), which are potent antigen-presenting cells involved in activating naive T cells to initiate antigenspecific immune response. The encoded protein is localized mainly in the perinucleus. One of the alleles (A/T) of this gene, that causes premature translation termination at aa 117, has been associated with an increased prevalence of major depression in humans

## **Application Details**

| Application Notes: | IF(IHC-P) 1:50-200                                                                           |
|--------------------|----------------------------------------------------------------------------------------------|
|                    | IF(IHC-F) 1:50-200                                                                           |
|                    | IF(ICC) 1:50-200                                                                             |
| Restrictions:      | For Research Use only                                                                        |
|                    |                                                                                              |
| Handling           |                                                                                              |
| Format:            | Liquid                                                                                       |
| Concentration:     | 1 µg/µL                                                                                      |
| Buffer:            | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and |
|                    | 50 % Glycerol.                                                                               |
| Preservative:      | ProClin                                                                                      |
| Precaution of Use: | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be          |
|                    | handled by trained staff only.                                                               |
| Storage:           | -20 °C                                                                                       |
| Storage Comment:   | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.            |
| Expiry Date:       | 12 months                                                                                    |
