## Datasheet for ABIN1692746 anti-GnRH2 antibody (AA 1-80) (Alexa Fluor 350)

Overview

Quantity:	100 μL
Target:	GnRH2
Binding Specificity:	AA 1-80
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This GnRH2 antibody is conjugated to Alexa Fluor 350
Application:	Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))

## Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human GNRH2/GnRH II
Isotype:	IgG
Predicted Reactivity:	Human
Purification:	Purified by Protein A.

## Target Details

Target:	GnRH2
Alternative Name:	GNRH2 (GnRH2 Products)
Background:	Synonyms: GnRH II, GnRH-associated peptide 2, GnRH-associated peptide II, gnrh2,

Precaution of Use:

	GON2_HUMAN, Gonadoliberin II, Gonadotropin-releasing hormone 2, Gonadotropin-releasing
	hormone II, LH-RH II, Luliberin II, Luteinizing hormone-releasing hormone II, Progonadoliberin 2,
	Progonadoliberin II.
	Background: Human reproduction is controlled by the hypothalaic-pituitary gonadal axis laid
	down early in fetal development. Gonadotropin releasing hormone (GnRH), also known as
	GnRH-associated peptide, luteinizing hormone releasing hormone (LHRH), luliberin or
	gonadorelin, is a decapeptide that is an important molecule in the hypothalamic-pituitary-
	gonadal axis control circuit. GnRH is produced by hypothalamic neurons and secreted in a
	pulsatile manner into the capillary plexus of the medianeminence. GnRH affects the release of
	lutenizing hormone and follicle stimulating hormone from gonadotropic cells in the anterior
	pituitary. In addition to hypothalamic GnRH (GnRH I), a second GnRH form (GnRH II) functions
	primarily in the midbrain. GnRH is expressed in the acrosomal region of human sperm and in
	the anterior pituitary tissue and cancer cells. Unlike GnRH I, GnRH II is highly expressed outside
	the brain, particularly in the kidney, bone marrow and prostate, suggesting that it may have
	multiple functions. GnRH binds to a specific G protein-coupled receptor in the pituitary to
	regulate synthesis and secretion of gonadotropins.
