Target Details

Background:	<p>Synonyms: ABTB 1, ABTB1, ABTB1_HUMAN, Ankyrin repeat and BTB POZ domain containing 1, Ankyrin repeat and BTB/POZ domain containing 1, Ankyrin repeat and BTB/POZ domain containing protein 1, Ankyrin repeat and BTB/POZ domain-containing protein 1, EF1ABP, Elongation factor 1A binding protein, Elongation factor 1A-binding protein, MGC20585, PP 2259, PP2259.</p> <p>Background: ABTB1 is a 478 amino acid protein localized to the cytoplasm. ABTB1 contains two ANK repeats and two BTB (POZ) domains. The BTB (POZ) domain is thought to be involved in protein-protein interactions, and may indicate a role of ABTB1 in developmental processes. It has also been suggested that ABTB1 may be a mediator of the PTEN growth-suppressive signaling pathway. ABTB1 is ubiquitously expressed in all fetal tissues, with lower levels of expression found in adult heart. ABTB1 exists as four isoforms produced by alternative splicing.</p>
