## Datasheet for ABIN1693036 anti-GAS2 antibody (AA 141-240) (Alexa Fluor 350)

Overview

| Quantity:            | 100 µL  |  |
|----------------------|---|--|
| Target:              | GAS2  |  |
| Binding Specificity: | AA 141-240  |  |
| Reactivity:          | Human   |  |
| Host:                | Rabbit  |  |
| Clonality:           | Polyclonal  |  |
| Conjugate:           | This GAS2 antibody is conjugated to Alexa Fluor 350   |  |
| Application:         | Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |  |

## Product Details

| Immunogen:            | KLH conjugated synthetic peptide derived from human GAS2 |  |
|-----------------------|--|--|
| lsotype:              | IgG  |  |
| Predicted Reactivity: | Human,Mouse,Rat,Cow,Sheep,Pig                            |  |
| Purification:         | Purified by Protein A.                                   |  |

## Target Details

| Target:           | GAS2   |
|-------------------|--|
| Alternative Name: | GAS2 (GAS2 Products)   |
| Background:       | Synonyms: GAS 2, GAS-2, Gas2, GAS2_HUMAN, Growth arrest specic 2, Growth arrest specic |

|  | protein 2, Growth arrest-specic protein 2, MGC32610.   |
|--|--|
|  | Background: Gas2 is a 313 amino acid protein encoded by the human gene GAS2. Gas2 is   |
|  | thought to play a role in apoptosis by acting as a cell death substrate for caspases. Gas2, a  |
|  | component of the microfilament system, is cleaved by a caspase (caspase-3 and caspase-7) at  |
|  | Asparagine 278 during apoptosis. The cleaved form resulting from this dramatically induces   |
|  | the rearrangement of the Actin cytoskeleton and causes potent changes in the shape of the  |
|  | affected cells. Gas2 is believed to also be involved in the membrane ruffling process. During the  |
|  | G0-G1 transition phase Gas2 can be found phosphorylated on its serine residues. Gas2 is a  |
|  | cytoskeleton and peripheral membrane protein that co-localizes with Actin fibers at the cell   |
|  | border and along the stress fibers in growth-arrested fibroblasts. Gas2 is mainly membrane-  |
|  | associated but when hyperphosphorylated it will accumulate at membrane ruffles. Gas2 is  |
|  | specifically expressed at growth arrest and is ubiquitously expressed with highest levels found  |
|  | in liver, lung and kidney. There is no evidence, however, of Gas2 expression in spleen.  |
| Gene ID:   | 2620   |
| Pathways:  | Caspase Cascade in Apoptosis   |
