Target Details

Background:	<p>Synonyms: Feline leukemia virus subgroup C cellular receptor, Feline leukemia virus subgroup C receptor, Feline leukemia virus subgroup C receptor related protein 1, Feline leukemia virus subgroup C receptor-related protein 1, FLVC1_HUMAN, FLVCR 1, FLVCR protein, FLVCR1, hFLVCR.</p> <p>Background: FLVCR is responsible for the exportation of cytoplasmic heme groups. It is believed that it may protect developing erythroid cells from heme toxicity. Expression of FLVCR in cells will cause susceptibility to FeLV-C (Feline leukemia virus subgroup C) in vitro. FLVCR is found in all hematopoietic tissues, including peripheral blood lymphocytes and fetal liver, and some expression is found in pancreas and kidney. It is down-regulated in haemopoietic progenitor cells undergoing differentiation and hemoglobinization.</p>
