Target Details

Folypoly-gamma-glutamate synthetase, Folypolyglutamate synthase, Folypolyglutamate synthase mitochondrial, FPGS, mitochondrial, OTTHUMP00000022201, OTTHUMP00000022202, Tetrahydrofolate synthase, Tetrahydrofolypolyglutamate synthase. Background: This gene encodes the folypolyglutamate synthetase enzyme. This enzyme has a central role in establishing and maintaining both cytosolic and mitochondrial folypolyglutamate concentrations and, therefore, is essential for folate homeostasis and the survival of proliferating cells. This enzyme catalyzes the ATP-dependent addition of glutamate moieties to folate and folate derivatives. While several transcript variants may exist for this gene, the full-length natures of only two have been biologically validated to date. These two variants encode distinct isoforms.
