## Target Details

Target:	GKAP1
Alternative Name:	GKAP1 ( <a href="#">GKAP1 Products</a> )
Background:	Synonyms: cGMP dependent protein kinase anchoring protein of 42 kDa, cGMP-dependent

## Target Details

protein kinase-anchoring protein of 42 kDa, G kinase anchoring protein 1, G kinase-anchoring protein 1, gkap1, GKAP1\_HUMAN, GKAP42.

Background: This gene encodes a protein that is highly similar to the mouse cGMP-dependent protein kinase anchoring protein 42 kDa. The mouse protein has been found to localize with the Golgi and recruit cGMP-dependent protein kinase I alpha to the Golgi in mouse testes. It is thought to play a role in germ cell development. Transcript variants encoding different isoforms have been found for this gene.
