# Datasheet for ABIN1694825 anti-ERMAP antibody (AA 61-120) (Alexa Fluor 488)

Overview

| Quantity:            | 100 μL  |
|----------------------|---|
| Target:              | ERMAP   |
| Binding Specificity: | AA 61-120   |
| Reactivity:          | Human   |
| Host:                | Rabbit  |
| Clonality:           | Polyclonal  |
| Conjugate:           | This ERMAP antibody is conjugated to Alexa Fluor 488  |
| Application:         | Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |

## Product Details

| Immunogen:            | KLH conjugated synthetic peptide derived from human ERMAP |
|-----------------------|---|
| Isotype:              | IgG   |
| Predicted Reactivity: | Human,Mouse,Rat   |
| Purification:         | Purified by Protein A.                                    |

#### Target Details

| Target:           | ERMAP   |
|-------------------|---|
| Alternative Name: | ERMAP (ERMAP Products)  |
| Background:       | Synonyms: ERMAP, ERMAP_HUMAN, Erythroblast membrane associated protein, Erythroid |

MGC118811, MGC118812, MGC118813, PRO2801, Radin blood group Rd, Radin blood group
antigen, RD, SC, Scianna blood group Sc, Scianna blood group antigen.
Background: ERMAP is a single-pass type one membrane protein that belongs to the
immunoglobulin superfamily. Expressed in cord blood, fetal liver and adult bone marrow,
ERMAP is thought to function as a cell adhesion molecule in erythroid cells and is responsible
for expression of the Scianna/Radin (Sc/Rd) blood group antigen system. The Sc/Rd system is
comprised of seven antigens that are present on the surface of red blood cells and have a
variety of functions ranging from protein transport to cell adhesion. These seven blood antigens
can differ in their expression within a population and may sometimes differ between mother
and child. A fetus expressing different blood antigens than its mother may cause the mother to
produce against the fetal blood. This condition is known as hemolytic disease of the newborn
(HDN) and is characterized by jaundice, anemia and in some cases, infant death.

Gene ID:

114625

### Application Details

| Application Notes: | IF(IHC-P) 1:50-200    |
|--------------------|-----------------------|
|                    | IF(IHC-F) 1:50-200    |
|                    | IF(ICC) 1:50-200      |
| Restrictions:      | For Research Use only |

#### Handling

| Format:            | Liquid   |
|--------------------|--|
| Concentration:     | 1 μg/μL  |
| Buffer:            | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.        |
| Preservative:      | ProClin  |
| Precaution of Use: | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only. |
| Storage:           | -20 °C   |
| Storage Comment:   | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                                  |
| Expiry Date:       | 12 months  |
