anti-GLDC antibody (AA 51-150) (AbBy Fluor® 488)

\sim	
()\/△	rview
\cup	1 410 44

Quantity:	100 μL	
Target:	GLDC	
Binding Specificity:	AA 51-150	
Reactivity:	Human	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	This GLDC antibody is conjugated to AbBy Fluor® 488	
Application:	Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))	

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human GLDC	
Isotype:	IgG	
Predicted Reactivity:	Human, Mouse, Rat, Dog, Horse, Rabbit	
Purification:	Purified by Protein A.	

Target Details

Target:	GLDC	
Alternative Name:	GLDC (GLDC Products)	
Background:	Synonyms: GCE, GCSP, GCSP_HUMAN, GLDC, Glycine cleavage system P protein, glycine	

cleavage system protein P, Glycine decarboxylase, glycine decarboxylase P protein, Glycine dehydrogenase decarboxylating mitochondrial, Glycine dehydrogenase [decarboxylating], mitochondrial, Gycine dehydrogenase decarboxylating, HYGN1, MGC138198, MGC138200, NKH.

Background: The glycine cleavage system is comprised of AMT (known as Protein T), GCSH (known as Protein H), DLD (known as Protein L) and GLDC (known as Protein P), all of which work together to catalyze the cleavage and degradation of glycine. GLDC (glycine dehydrogenase), also known as GCE, GCSP (glycine cleavage system P protein) or HYGN1, is a 1,020 amino acid protein that localizes to the mitochondria and belongs to the gcvP family. GLDC binds to glycine and enables the methylamine group from glycine to be transferred to the Protein T. GLDC exists as a homodimer and utilizes pyridoxal phosphate as a cofactor. Mutations in the gene encoding GLDC leads to nonketotic hyperglycinemia (NKH), also known as glycine encephalopathy (GCE), an autosomal recessive disease characterized by accumulation of a large amount of glycine in body fluid and by severe neurological symptoms.

Gene ID:

2731

Application Details

Application Notes:	

IF(IHC-P) 1:50-200

IF(IHC-F) 1:50-200

IF(ICC) 1:50-200

Restrictions:

For Research Use only

Handling

Format:	Liquid
Concentration:	1 μg/μL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
