anti-NR1H4 antibody (AA 175-280) (AbBy Fluor® 488)

\sim			
	N/P	r\/I	i⊢₩

Quantity:	100 μL
Target:	NR1H4
Binding Specificity:	AA 175-280
Reactivity:	Human, Rat, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This NR1H4 antibody is conjugated to AbBy Fluor® 488
Application:	Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human Bile Acid Receptor NR1H4
Isotype:	IgG
Cross-Reactivity:	Human, Mouse
Predicted Reactivity:	Rat,Dog,Cow,Sheep,Pig,Horse
Purification:	Purified by Protein A.

Target Details

Target:	NR1H4
Alternative Name:	Bile Acid Receptor NR1H4 (NR1H4 Products)

Target Details

Background:	Synonyms: BAR, FXR, HRR1, HRR-1, PFIC5, RIP14, Bile acid receptor, Farnesoid X-activated
	receptor, Farnesol receptor HRR-1, Nuclear receptor subfamily 1 group H member 4, Retinoid X
	receptor-interacting protein 14, RXR-interacting protein 14, NR1H4
	Background: The steroid receptor superfamily acts through direct association with DNA
	sequences known as hormone response elements (HREs) and binds DNA as either homo- or
	heterodimers. The promiscuous mediator of heterodimerization, RXR, is the receptor for 9-cis
	retinoic acid, and dimerizes with VDR, TR, PPAR, and several novel receptors including LXR
	(also referred to as RLD-1) and FXR. FXR and LXR fall into a category of proteins termed orphar
	receptors? because of their lack of a defined function, and in the case of LXR, the lack of a
	defined ligand. FXR has been shown to bind a class of lipid molecules called farnesoids.
	LXR/RXR heterodimers have highest affinity for DR-4 DNA elements while FXR/RXR
	heterodimers bind IR-1 elements. Both LXR/RXR and FXR/RXR heterodimers retain their
	responsiveness to 9-cis retinoic acid.
Gene ID:	9971
UniProt:	Q96RI1
Pathways:	Nuclear Receptor Transcription Pathway, Steroid Hormone Mediated Signaling Pathway,
	Regulation of Carbohydrate Metabolic Process
Application Details	Regulation of Carbohydrate Metabolic Process

Handling

Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
