Target Details

Target:	GM2A
Alternative Name:	GM2A (GM2A Products)
Background:	Synonyms: SAP-3, GM2-AP, Ganglioside GM2 activator, Cerebroside sulfate activator protein,

Target Details

Sphingolipid activator protein 3, GM2A

Background: The large binding pocket can accommodate several single chain phospholipids and fatty acids, GM2A also exhibits some calcium-independent phospholipase activity (By similarity). Binds gangliosides and stimulates ganglioside GM2 degradation. It stimulates only the breakdown of ganglioside GM2 and glycolipid GA2 by beta-hexosaminidase A. It extracts single GM2 Molecules from membranes and presents them in soluble form to beta-hexosaminidase A for cleavage of N-acetyl-D-galactosamine and conversion to GM3.
